Acknowledgments

We would like to thank the many local Riverside Trail Managers who are invaluable in helping us display their finest work. It is wonderful to work with people who obviously love what they do and are sensitive to the natural areas we work with. It is also wonderful to work with people who obviously love what they do and are sensitive to the natural areas we work with.

In particular we would like to recognize: the City of Pittsfield Open Space and Natural Resource Program, Massachusetts Audubon Society, Laurel Hill Association, Berkshire Natural Resources Council, The Great Barrington Land Conservancy, The Trustees of Reservations, The Kent Land Trust, Connecticut Forest and Park Association and Connecticut Department of Energy and Environmental Protection.

Special thanks to our generous funders — Housatonic Heritage and Northwest Connecticut Community Foundation — who made this brochure possible.

Heartfelt thanks to Aaron Hunt, HVR Stallard Stiers, who spent countless hours researching and developing maps for this final brochure.

We also want to thank the hundreds of volunteers who contribute and help manage, maintain, and protect the river and the river trails.

M A S S A C H U S E T T S  R I V E R S  P R O T E C T I O N  A C T  O F  1 9 9 6

In order to protect the natural carrying capacity of rivers and to encourage and facilitate the development of a comprehensive statewide system of trails and programs to help the public use such resources in a manner that does not impair or destroy the natural resources of any state-owned or state-controlled area, the Massachusetts Rivers Protection Act of 1996 was enacted.

A public trail is defined as a trail that has been publicly maintained and is maintained to the extent that permits reasonable and safe access to the public.

Riverside areas are considered important to us because they provide a wide range of values, including: recreational, aesthetic, and economic benefits, and because they help to protect the natural resources of the rivers and streams.

Riverside areas are considered important to us because they provide a wide range of values, including: recreational, aesthetic, and economic benefits, and because they help to protect the natural resources of the rivers and streams.

RESOURCES FOR TRAIL DESIGN, CONSTRUCTION, MANAGEMENT AND PROTECTION

If you are interested in trail design, construction, or management, here are a few recommendations on where to get started:

“Appalachian Mountain Club Complete Guide to Trail Building and Maintenance”

This is a well-timed guide that provides instruction on building and maintaining trails, as well as how to get permission to build them.

Connecticut Land Conservation Trust

A non-profit organization that provides financial assistance to land trusts and municipalities to help them purchase and manage land.

Berkshires Natural Resource Council (BNRC)

The Berkshires Natural Resource Council is an organization dedicated to preserving and enhancing land within the Berkshires. They provide resources and support for trail building and management.

For more information, visit their websites or contact them directly.
